Company Profile

OUR FOCUS

Enermak, a leader in Turkey, focuses on having a sustainable and profitable growth with the ability to become an important player all over the world.

OUR MAIN OBJECTIVE

Since its foundation, Enermak sets the common gain as main aim for all its stakeholders.

OBJECTIVES, GOALS AND PRIORITIES

Enermak aims to satisfy its stakeholders by providing products and services with universal quality and standards which are continuously developed with its employees. For this reason, it aims to be a symbol for credibility, continuity and respectability symbol for its country, its customers, its solution partners and its personnel. Creating value for our customers and responding to their expectations towards quality and stability is our first priority. It is our duty to stand by our products, to be by the side of our customers for the after sales, to ensure that they follow developments and that they can benefit from our products at the maximum level.

Our main goal is to be the best in quality and service and to protect this image we have in the sector. To achieve this goal, it is our basic principle to assume management and to be a leader in the market. The quality of our products and services starts with the quality of our employees. Employing the best staff and labour force under Enermak's roof, providing the utmost benefit from our human resource talents, strength and creativity; To increase their productivity, to enable them to develop, and to create a work environment where cooperation and solidarity are indispensable is the way Enermak chose to ensure the continuity of its generations.

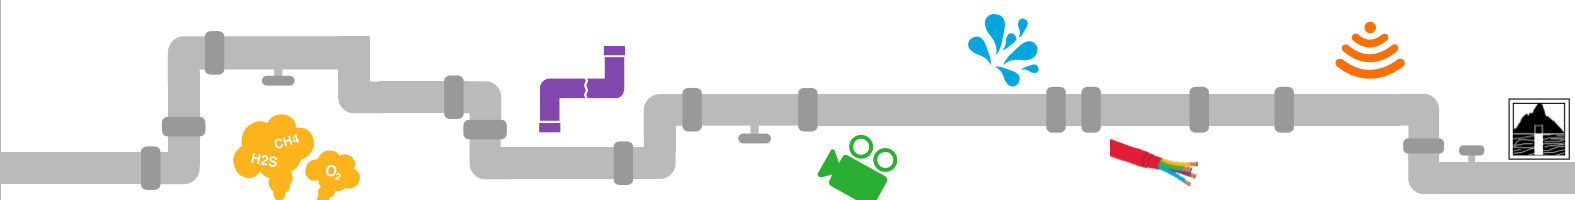

It is our principle to behave with good intentions and understanding, to always comply to laws and ethics code in order to ensure fair and mutual benefit in all our partnerships. Fulfill our responsibilities towards people of today and future generations is another fundamental element that we are leading and can not give up on. For Turkey and the world, it is our duty to behave with the consciousness of environmental protection and spread this knowledge.

At the core of our principles lies the effort to lead the sector and to offer better solutions to our stakeholders in order to make a difference.

At Enermak, we have been working since 2000 with a focus on customer satisfaction, blending confidence and quality. Here lies the reason of our rise to a leading position in infrastructure works. Today, Enermak offers solutions for a variety of infrastructure problems such as piping, cable and all other underground networks in 3D, water and gas leaks, insulation errors in pipelines, location of cable faults, in-channel imaging and rehabilitation services. Serving the leading infrastructure companies from our foundation until today, Enermak is the representative of the worldwide well-known manufacturing companies in Turkey.

Our main goal is to provide quality and reliable service. We can easily be adapted to field conditions because we Enermak has been established by expert engineers. We have an up-to-date knowledge of product, technique and practice, and our past experience helps us solve any problems that may be encountered in the shortest possible terms.

We are closely following the developments in the world today as yesterday. Our company which is always working to be happy and ensure benefit and aiming to quality, has in addition to ISO 9001 and ISO 14001 quality and environmental management systems, ISO 18001 Occupational Health and Safety Systems and the TSE Service Place Competence certificate. Our awareness of the importance of After-Sales Service and support further enhances our sensitivity to this issue.

Enermak's Quality Management System; We can describe it as a structure where bureaucracy and documentation are minimized in order to be able to make quick and effective decisions and actions.

This structure was achieved by integrating the benefits of the following processes into our quality system:

The effort to provide service to our customers' current and future expectations through customer-focused work,

In order to reach our company targets, we aim to reveal the leadership and management that employees are fully engaged in,

To make mutually beneficial activities in order to create common values with our solution partners and our dealers,

Ensure that the progress and performance of Enermak is continuously improved as the permanent goal of Enermak employees,

To make effective decisions based on data and information analysis,

To ensure that employees are aware of the fact that they represent all levels of Enermak and their high ideals, and to ensure that their energy and capabilities are uplifted by Enermak's success and quality line,

To manage the activities and related resources as a single process in order to reach the desired results more efficiently and in whole,

We use ISO 9001: 2008, ISO 14001: 2004 Quality and Environmental Management Systems, ISO 18001 Occupational Health and Safety Systems as an effective argument for the continuity and development of our quality management system.

Again, we have TSE (SCC) Service Competence Certificate in this frame.

These certifications and documents are validated by periodic inspection.

ENERMAK - THE FUTURE OF INFRASTRUCTURE

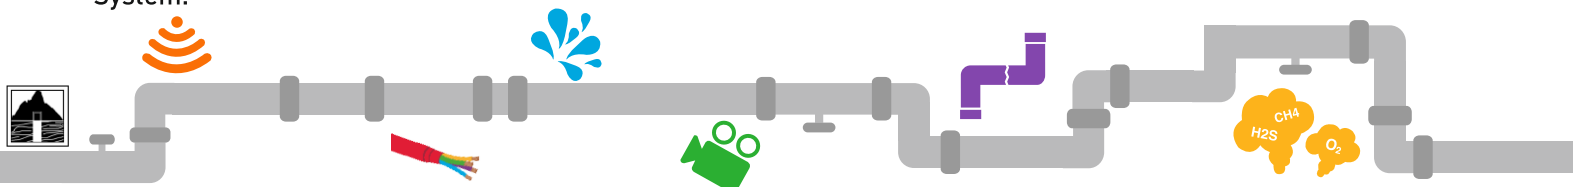

Enermak is a dynamic, powerful and reliable company that is specialized, dynamic and always working for this purpose, aiming to adapt Turkey's infrastructure to the 21st century technology. The obtained achievements, documents and references reflect its objectives.

Enermak Energy, was established in 2000 by experienced engineers who are well versed in the field conditions to provide solutions to infrastructure problems. Growing day by day, Enermak has become a representative in Turkey by establishing relations with the world's leading companies that produce technology.

The company closely follows the developments and changes in the world, specializing in infrastructure detection, inspection and measurement systems. Enermak is not only selling hardware but also providing service in the fields of gas and water leakage, cable fault location, pipe insulation fault, underground cable and pipeline detection, ultrasonic flow and level measurement, channel cleaning and inspection.

Being Turkey's highly equipped company in its field, it acts to increase the quality level of infrastructure construction and operation (maintenance, repair services) in Turkey by maximizing the level of use of after-sales services and professional trainings and effective equipment in the infrastructure sector.

ISO 9001: 2008 Quality Management System, ISO 14001: 2004 Environmental Management System, ISO 18001 Occupational Health and Safety Systems and TSE-HYB (Turkish Standards Institute Service Competence Certificate) are the important tools used for the permanent guarantee and development of ENERMAK's Quality Management System.

Our Products

-Water Leak Detection

- *Acoustic Listening Microphone
- *Correlators
- *Noise Loggers
- *Gas Tracing System

-Underground Detection

- *Ground Penetrating Radar
- *Cable - Pipe Detection Detectors
- *Metal Detectors
- *Smart Markers and Warning Tapes

-Sewer Inspection

- *Cameras
- *Camera Systems
- *Crawlers
- *Winches
- *Control Panel
- *Push Road Cameras
- *Software

-Sewer Cleaning

- *Portable Systems
- *Trailer Systems
- *Vehicle Systems

-Sewer Cutting and Rehabilitation

- *Vehicle Systems
- *Portable Systems

-Fully Equipped Vehicles

- *Enermak Equipped Vehicles
- *Physical Water Lost Detection
- *Underground Lines Detection
- *Sewer Inspection Vehicles (CCTV)
- *Sewer Grooving and Removal Vehicles
- *Gas Leak Detection Vehicles
- *Water and Sewer Repair Vehicles
- *Sewer Rehabilitation Vehicles
- *Borehole Imaging and Water Monitoring Vehicles
- *Cable Blasting and Burning Vehicles

-Flow Measurement

- *Ultrasonic Flowmeters
- *Open Channel Flowmeters
- *Electromagnetic Flowmeters
- *Pressure, Level and Thickness Gauges

-Gas Leak Detection Devices

- *Biogas
- *Gas Leak Detection Devices
- *Gas Warning Devices
- *Odorisation
- *Test Gases and Test Sets

-Cable Measurement and Fault Detection

- *Cable Fault Measurement Systems
- *Cable Fault Detection, Burst - Burned Systems

-Pipelines

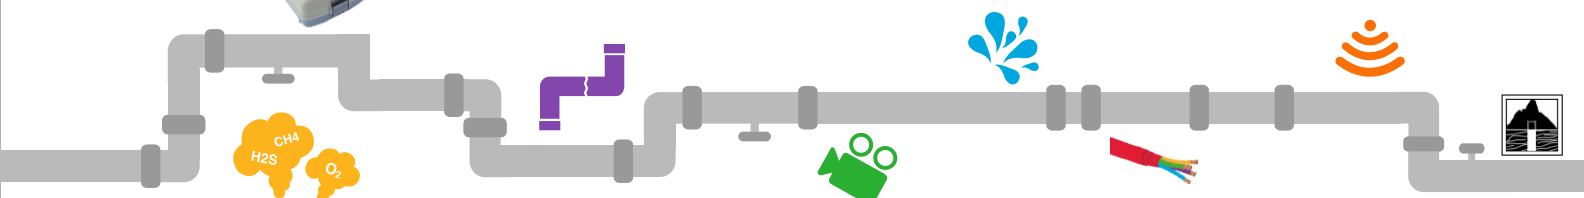

- *Pipeline Measurement and Detection Equipment
- *Pipeline Construction and Maintenance Equipment

-Borehole Inspection and Measurement

- *Well Logging Systems
- *Borehole Inspection Systems

-Pipe - Channel Plugs

- *Channel Stoppers
- *Channel Test Plugs
- *Channel Packers
- *Airbags
- *Accessories

- Pipe and Cable Location and Depth Detection
- Underground Mapping
- Pipe and Sewer Inspection
- Water Leak Detection
- Flow, Level and Pressure Measurements
- Gas Leak Detection
- Sewer Cleaning
- Hydraulic Modelling
- Lost Cover-Manhole Detection
- Pipeline Integrity Surveys (CIP, DCVG, ACVG)
- Isolation Fault Detection

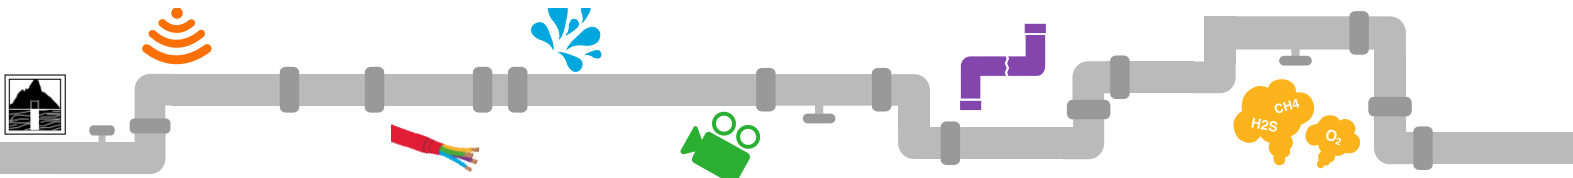

After Sales

Under the frame of our motto “Unconditioned Customer Satisfaction” , Technical Service and Spare Part Services are given by Enermak.

In addition to Technical Service and Spare Part Services, Enermak organizes pre-sales, on-sales and post sales educational seminars so as our customers to derive benefit from our products on the highest level.

Here, the aim is to gather experience and quality for Unconditioned Customer Satisfaction
