## DETECTABLE WARNING TAPES

ENERMAK ENERGY is the market leader of underground detectable warning tapes with its high quality detectable features.

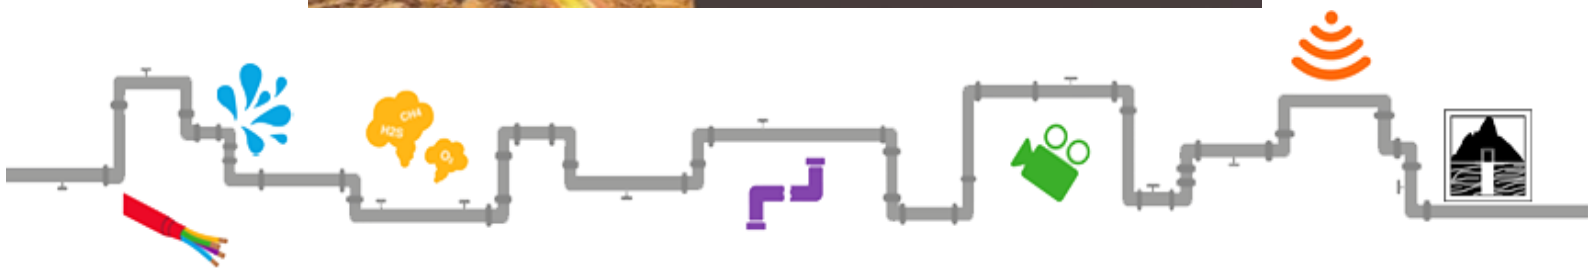

The warning tapes are printed on aluminum foil and placed on the duct before the closure of underground cables such as electricity; water and natural gas are used for line detection or pre-excitation lines. Due to the aluminum in it, it can be easily detected by means of metal detectors (models: Cat 4 /RD 7100 /RD 8100) above the ground.

Printed warning messages prevent ink wiping and are resistant to acid, alkali, moisture and other damaging elements present in the soil. Thus, the prints allow the tape to be projected and easily detectable completely. The tape should be visible before reading. For this reason, bold black letters are printed along the whole band with warning, definition and color code.

Underground detectable warning tapes; it is laminated with aluminum polyester and polyethylene to provide resistance under the soil for many years.

All underground marking tapes are made by extrusion laminated and strip color 100% pigment. Standard APW codes are used in all models.

Available in rolls of 300 or 500 meters and in widths of 7.5 cm-10 cm -15 cm -20 cm -30 cm-40 cm or special manufacture for customize.

## NON- DETECTABLE WARNING TAPES

ENERMAK ENERGY underground non-detectable warning tapes are made in polyethylene. They are used in electricity, phone, clean water, sewage, gasoline, oil marking of all kind of underground installations. Tapes are not contain any heavy metal, print warning messages prevent ink wiping and are resistant to acid, alcali, moisture and other damaging elements present in the soil.

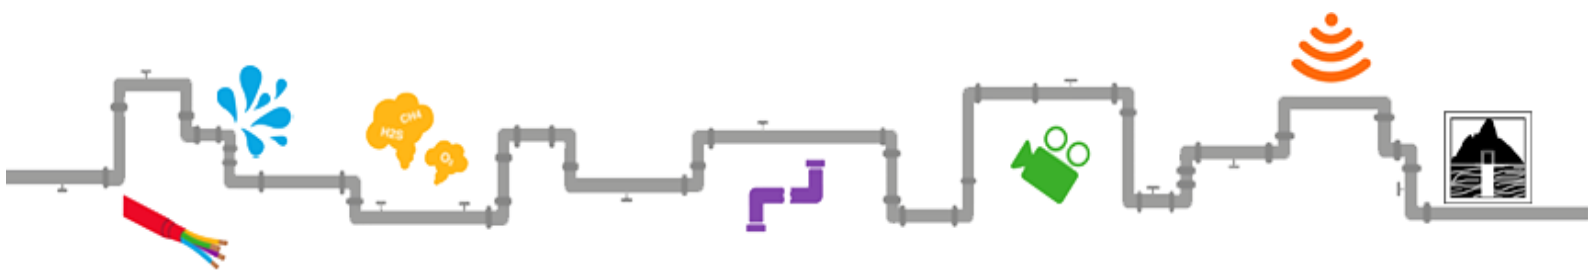

Available in rolls of 300 or 500 meters and in widths of 7.5 cm-10 cm -15 cm -20 cm -30 cm-40 cm or special manufacture for customize.

## MATERIAL COLOR OPTIONS:

Apart from the internationally accepted color and warning texts, production can be made for the desired width, color and text.

Colour Options: Blue, Green, Orange, Purple, Red, White and Yellow
